

# REBATES GET YOU FREE MONEY FOR \$AVING ENERGY!

*Be sure to call the utility companies and double check the requirements before you schedule a contractor.*

For example, if you need two types of insulation installed, you would only qualify once for the rebate (one insulation rebate per address). Also, if you have oil heat, you only can qualify for a rebate if you start with the free utility program audit. This table was updated in February 2010, please call to confirm there have been no recent changes.

The focus of the Waltham Residential Energy Efficiency Program is quality control. Two tests -- the **blower door** and **infrared camera test** -- will evaluate the effectiveness of any work you have done on your home and are not offered by the free utility program audit. You can use the rebates & tax credits below to finance these two independent tests, which cost approximately \$200-\$400 total. We are collecting data to analyze the quality and effectiveness of weatherization done by homeowners and contractors in the Newton area. You can assist by sharing the data from your home! For details about this and other weatherization options, contact Green Decade at 617-965-1995 or go to [www.greendecade.org](http://www.greendecade.org)

The Waltham Recycling Department Is Online
