

CITY OF WALTHAM DRIVEWAY PAVING PERMIT APPLICATION

All residential and commercial property owners are required to apply for permits when paving driveways and parking lots. Part of the application process is to submit a plan or sketch showing the existing pavement and any previously unpaved surfaces that will be paved. This permit applies even if you are only repaving existing driveways and parking areas. If only resurfacing (not removing existing pavement) this permit is sufficient. If removing existing pavement or adding 150 square feet or more of pavement an I & I/Utility permit is required.
