

Subcommittee on Outreach
Joe Vizard, Chairman
Fernald Reuse Committee

1. FWG member orgs and process (public meetings, drafts and redrafts) to include various shared interests. {WLT, WATCH.CDC, LWV, WFCF}
2. Our principles for going forward: reuse what is feasible*, reduce impervious areas, link to public transit, create jobs for residents of rehab and new spaces, new construction must be green for long-term economic sustainability.

* Howe Library (57/21), Howe Hall (75/41), Hillside Cottage (47/43), Warren Hall (29/11), Kelly (51/100), and Food Service (54/40). The numbers in (.../...) refer to the numbers on the four-color map (Marie's map) and the corresponding DCAM numbers.

The rationale for these is that they have a supportive constituency (Friends of Howe Library), they have been fairly recently used, renovated, and do not have asbestos.

3. Timelines depend on availability of funding and creativity of proposals. For example, any number of performing arts organizations could provide sweat equity for free use of space in Howe Hall. A food service company would renovate building 54/40 and employ local trades to do that while hiring workers for operation of their service for schools, nursing homes, meals on wheels, et al.
4. Green construction includes materials that are energy efficient, recycled, low maintenance, and employs available on-site energy sources. New construction is planned to consider job-creation on-site and transit improvements
