

Current Projects and Future Projects

Implementation of forest management practices:

- Increase age diversity of forest stands & development of forest understory.
- Eradication and management of invasive species.

Trail revitalization:

- Establish routine maintenance practices for trails and other points of interest.
- Development and implementation of park wide trail and interpretive signs.
- Poison Ivy control.
- Erosion Control.
- Reclamation of overgrown trails.
- Development of new park map which better represents current park conditions and amenities.

Alternative resource allocation:

- Seek and establish relationships with 3rd party organizations such as Waltham Boy scout troops and 5th Avenue property management team.
- Apply for various grant programs through State and Federal agencies.

Hazard tree assessment and pruning:

- Assess hazard trees within the park and establish database for removal.
- Establish routine pruning within park on trails, access road and points of interest.

Nature education:

- Develop and offer various programs focused on nature education and skills.
