

Eco-Charrette

Date:

April 22, 2019

Location:

Waltham High School
617 Lexington Street
Waltham, MA

Time:

2:00 pm to 4:00 pm

You are invited to join the Waltham School Building Committee and the design team for an Eco-Charrette at the Waltham High School

Attendees:

Waltham High School Building Committee, Waltham High School Administration, Teachers, Students, Community Members, Public Officials, Architecture & Engineering Design Team (SMMA), Utilities & Others Committed to Integrated Design & Achieving Elevated Environmental Building Performance.

An eco-charrette is an intensive workshop where the project stakeholders, community members and experts convene to brainstorm on project sustainable design goals and objectives.

The Eco-Charrette's 3 main objectives:

1. To familiarize and educate stakeholders on general sustainable design principles and the LEED for Schools certification process
2. Identify current and potential sustainable design opportunities
3. Develop sustainable design goals that specifically align with the School District and the Town's goals and mission

Eco-Charrettes are an integrated part of the design process, allowing stakeholders and community members to participate in discussing ideas early in the design process in collaboration with the design team. The charrette defines and encourages agreement on project goals, as well as promote "collective enthusiasm" for the project with early realistic goals and objectives.

Agenda:

- Introductions
- Introduction to Sustainability & LEED for Schools
- Project Overview
- Goal Setting
- Working Groups
- Group Reports
- Charrette Wrap-Up/Next Steps
