## **1. PROJECT OVERVIEW:**

The City of Waltham is under an Administrative Consent Order (ACO) with the Massachusetts Department of Environmental Protection (MassDEP) for the elimination of sewer system overflows (SSOs). A milestone in the ACO implementation plan is to complete an assessment of the work completed in the initial five year plan, 2010 – 2014 referred to as the Phase I Plan.

The Phase 1 Assessment Report is to include:

Detailed technical information on performance of the Phase I sewer system overflow abatement work over the first five years. The report shall include, at a minimum:

- Results of a continuous flow metering program, inclusive of 2010 Spring Flow monitoring;
- A summary of any and all SSO events, including the causes, and response actions;
- A review of wet weather-related SSO events, and determination on level of service (in terms of design storm capacity) provided by the sewer system;
- A review of the Phase II recommended plan included in the Final Sewer System Facilities Plan and Hydraulic Model with recommendations, including a plan and schedule for implementing the Phase II plan.

The project will consider system capacity needs to handle the existing flows and projected increases in dry-weather flows because of system growth as well as system improvements required to control peak wet-weather flows and potential overflows from the system resulting from excessive infiltration and inflow (I/I). The project study area is the sewer system serving the City of Waltham. The sewer system consists of 12 major interceptor sewers which convey sewerage to the MWRA. There are approximately 4,000 manholes, 137 miles of gravity pipe ranging from 8 to 42 inches in diameter, and 6 pump stations.

The Phase I Assessment Report will be developed which details the work performed to date by the City and make recommendations for continued sewer system rehabilitation in support of the existing ACO. The following tasks are to be completed as part of the development of the Phase I Assessment Report.

## **2. PROJECT SCOPE:**

**Task 1: Data Collection/Review:** The Consultant will review all documents and reports provided by the City pertaining to the ACO including but not limited to the Sewer System Facilities Plan and Hydraulic Model and plans associated with all I/I removal projects completed by the City and private entities during the last five years. After review of the data, the Consultant will attend a meeting with MASSDEP to confirm the detailed scope of work and schedule for the Phase I Assessment Report to meet the requirements of the ACO.

**Task 2: SSO Summary:** As part of this task the Consultant will compile data provided by the City that references all SSO occurrences as reported to MASSDEP. The Consultant will prepare a summary of all

events including the causes and response actions and map all locations on a GIS map. All GIS base mapping will be provided to the Consultant.

**Task 3: Flow Metering Program:** As part of this task the Consultant will implement a City-wide continuous metering program for the fall 2014 period. Assume a 4 week metering period for this proposal. The meter locations will consist of the 15 locations metered in the 2007 fall metering program. The flows will be analyzed for dry and wet-weather conditions to quantify infiltration and wet-weather inflow. The new flow data will be compared to the flow data obtained in the 2007 fall program to quantify and confirm if the City has achieved the 40% I/I flow reduction required in the ACO in the sub areas identified in the Facilities Plan.

**Task 4: Sewer Collection Model Update:** A hydraulic model was developed using USEPA's SWMM 5 software. This model will be provided by the City to the Consultant and used for this task. The model will be updated by the Consultant with system improvements completed in the last 5 years and recalibrated using the metering results obtained in Task 3. Flow data from the MWRA will be used to validate the hydraulic model output. The Consultant shall complete various model scenarios for a minimum of 4 storm events to determine system capacity and limitations. This analysis shall include a review of the City's historical wet weather SSOs.

**Task 5: Phase II Plan Review:** Based on the results of Tasks 1-4, the Consultant will review the scope and schedule for the Phase II Plan developed in the 2011 Facilities Plan and make recommendations for updating and implementation of the plan for the next five years.

**Task 6: Phase I Assessment Report:** The Consultant will prepare a report documenting the findings obtained in Task 1-5. A draft report will be submitted for review to incorporate City comments before issuing a final report. The Consultant will attend a meeting with MASSDEP to present the findings of the Phase I Assessment.

### **3. DELIVERABLES:**

As part of this project, the Consultant shall provide to the City at a minimum the following items:

- Detailed Scope of Work
- Flow Metering Report
- Updated Hydraulic Model & Software
- Draft Phase I Assessment Report
- Final Phase I Assessment Report (DUE DECEMBER 2014)
- Four -Progress Meetings with City
- Two Meetings with City and MassDEP

The Technical Approach should detail the Consultant's schedule to meet the final Phase I Assessment Report deadline showing specific milestones.

#### **4. EVALUATION AND RANKING OF PROPOSALS:**

Each Proposal shall be reviewed by a selection committee comprised of at least three members. Proposals will be evaluated upon the basis of the evaluation criteria for selection set forth. Submissions will then be ranked in the order of qualification. The first, second, and third ranked proposals will be further reviewed and evaluated, including reference checks by the committee. This further review and evaluation will include interviews or the opportunity to provide additional information to the committee.

The selection committee shall evaluate proposals based on the following criteria:
